- > The world's first multifunction systems with erasable print function.
- > Toshiba's unique hybrid printing technology allows users to print in either traditional black or erasable blue toner.
- > Equipped with state-of-the-art features for modern document workflows.
- > Designed for businesses which want to combine ecology, economy and efficiency.

CONNECT, INTEGRATE, SIMPLIFY AND REUSE

Toshiba's hybrid technology combines conventional printing with erasable printing which allows you to reuse paper over and over again. One single device easily connects, integrates, and simplifies your workflows — and also helps to save valuable resources.

At Toshiba, we are dedicated to serving our customers and committed to the future of our planet on our promise of Together Information.

Black and White printing has never been this green.

The world's first Black and White MFP with erasable print function.

EVERYTHING YOU NEED IN ONE SYSTEM

Ecology

The idea of a paperless office has been around for more than 40 years, yet even modern business workflows still require printed documents. Toshiba offers companies a practical approach to saving paper without impacting on proven print workflows. Our unique hybrid printing technology offers everything you would expect from a state-of-the-art multifunction printer (MFP) and more: You can now even reuse the paper.

Economy

One single system can print in regular black as well as in erasable blue. For you this means you can use the Hybrid MFP just like any other monochrome device to print in black and can choose from a variety of finishing options to ensure you have a system which covers all your needs. Our erasable blue toner allows you to reuse the paper you have printed on, so that you can use less paper, without having to print less. Reducing paper usage will save natural resources, reducing your company's footprint and also help you save money.

Efficiency

Driven by Toshiba's e-BRIDGE Next controller the system will boost your productivity. It provides ease-of-use and ensures that the device is capable of adapting to your document workflows. Whether you need to connect to 3rd party solutions or simply want to optimise your internal processes, the Toshiba Hybrid MFP is there to help you enhance your overall efficiency.

KEY FEATURES

- > A unique monochrome system with a speed of up to 45 pages per minute (ppm) and up to 35 ppm in erasable blue ensures the Hybrid MFP can handle even large jobs effortlessly.
- > A customisable, tablet-like user interface, gives easy access to the print, scan, copy, fax and erase functions.
- > Outstanding image quality you can rely on. No matter whether you use black or erasable blue toner, the result will always be the same: impeccable documents.
- > The optional Dual Scan Document Feeder can hold up to 300 sheets while processing documents at an amazing speed of up to 240 images per minute.
- > Utmost data security thanks to features such as the self-encrypting Toshiba Secure HDD and further optional security functions for IEEE2600.2 compliance.

OUR BEST TECHNOLOGY TO ENHANCE YOUR BUSINESS

Optimising workflows to get the most out of available resources has become essential for businesses which want to be successful. We have designed our Hybrid MFP to offer you all features you need to be productive and efficient. But there's more: we have added a unique erasable print function, which can be selected in the printer driver just like any other setting.

Connect

Having access to your documents when you need them is becoming more and more important. We have made sure you get what you want, whenever and wherever you want it.

- > **Multi Station Print** allows you to send print jobs from your computer and retrieve them at any convenient MFP by authenticating at that device, e.g. by swiping your badge.
- > **Cloud printing** ensures you have access to your documents no matter where you are. Our embedded apps let you send your documents directly to or print them from Microsoft OneDrive, Google Drive and Dropbox.
- > **Mobile printing** gives you the flexibility to print directly from your mobile device via AirPrint, Google Cloud Print, Mopria Print Service or our Toshiba e-BRIDGE Print & Capture app. With an optional module which activates the WiFi as well as the "Bluetooth" feature, you can easily connect mobile devices directly with the MFP.

Integrate

The Hybrid MFP incorporates our latest e-BRIDGE technology. This makes it easy to integrate the system into your existing IT infrastructure and helps the administrators to work more efficiently. The open platform architecture also enables the creation of customised workflows, that simplify complex scanning, archiving or other document management tasks.

Simplify

We strongly believe that good technology must be easy to use and that's how we designed the Hybrid MFP. The large tablet-like screen with an embedded web browser is easy to use and customisable to meet your needs. It gives direct access to all functions of the MFP and increases the efficiency of the users.

Toshiba's Hybrid MFP - all features you need in one unique system.

Reuse

Toshiba's Hybrid MFP comes with a unique feature: paper can be reused thanks to the erasable blue toner, which has a positive impact on the environment. The erasing can be done either via the Hybrid MFP or the optional paper reusing device, the e-STUDIO RD301.

PRINTING HAS NEVER BEEN THIS GREEN

How does it work?

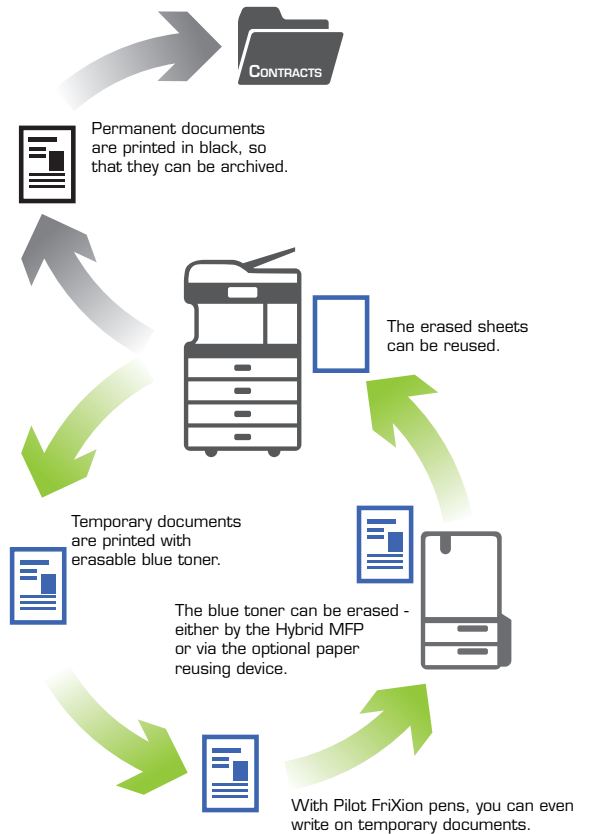

Often documents are only temporary, e.g. proofs or as a reminder to do something. For these cases Toshiba's hybrid system gives you the possibility to select the erasable blue toner, so that when you don't need your document anymore, you don't have to throw the paper away, but can delete whatever was printed on it and reuse the sheet. To make it easier rule-based printing can be activated in the printer driver. This allows you to define multiple rules for the printer driver to then automatically select the blue toner e.g. for all e-mails and faxes as these type of documents usually tend to be used only temporarily.

To easily track how much you have already saved, the e-BRIDGE Paper Reuse Report calculates paper reduction and average paper usage to show your environmental contribution at a glance.

How can the toner be erased?

The Hybrid MFP has a built-in erasing function. Simply place the used paper into the designated cassette and start the process. The blue toner will be erased making the sheets ready to be re-used for printing.

Alternatively, you can use the optional e-STUDIO RD301 — an erasing unit with advanced features. Not only does it erase at a speed of up to 30 ppm, it also sorts the paper into reusable and non-reusable paper. Additionally, it can also digitise the documents for electronic archiving before erasing the toner.

What is the benefit?

Assuming that you use a sheet of paper five times (i.e. reuse it four times) and you print 4,000 erasable pages per month, you can save 80% paper. This means that after five years you will have saved almost 200,000 sheets of paper. In other words: The same amount of paper which you would usually use in one year, will now last five years.

Besides saving costs for paper (purchasing, storage and disposal) there is also a significant environmental benefit as you automatically reduce the carbon emission and water consumption, which is generated during the paper production.
